

We do more than building buildings.
We're building *solutions.*

PROFESSIONAL OFFICE – MEDICAL

RIVER'S EDGE MEDICAL PARK

WHITE CITY

Scope and Responsibilities:

When Lawnwood Regional Medical Center wanted to develop an off-site medical professional office complex they turned to the **Design/Build Service** of Richard K. Davis Construction Corporation. Working directly with the architects, civil engineer and landscape architect, we were responsible for the design of the entire three phase project. We completed construction of the 8,168 square foot Phase I building with suites for two medical practices. The architecture incorporates wraparound porches, horizontal lap siding, and dormer windows with a double pitch-break roofline to blend with the surrounding rural residential character of beautiful White City.

Date of completion:

April 1994

Total square footage:

8,168 Building

Contact:

Jon Trezona

Chief Executive Officer

"Davis Construction is very responsive to the hospital's needs and we are always satisfied with their work product."

- Jay Finnegan
