

We do more than building buildings.
We're building *solutions.*

INSTITUTIONAL – COMMUNITY

HUMANE SOCIETY OF ST. LUCIE COUNTY

PORT ST. LUCIE

Scope and Responsibilities:

The Humane Society selected Richard K. Davis Construction Corporation (RKDCC) to build their new full service facility, not because they were the low bid, but due to their reputation and experience in the erection of pre-engineered metal building systems. The design team incorporated the complexities of open air courtyards for the animals to play and a towering cupola full of windows washing the lobby below in natural light. These aesthetic elements led to the wisdom that "A product is only as good as the skill of the craftsmen who install it" and to pay a small premium to hire the **in-house expertise** of RKDCC: a valuable decision that will pay weathertight dividends.

Date of completion:
July 2013

Total square footage:
12,229 Building

Contact:

David Robertson
Director of Operations

"No question or concern was ever too small to be addressed quickly and expertly as they remained intimately involved with all aspects of the shelter's construction along the way."

Design Partners:

MLM-Martin Architects, Inc.
Architect

Culpepper and Terpening, Inc.
Civil Engineer

Landscape Design Associates
Landscape Architect
