

Richard K. Davis

WE'RE BUILDING SOLUTIONSSM

INSTITUTIONAL - WORSHIP

TRINITY EPISCOPAL CHURCH

VERO BEACH

Date Of Completion: December 2005

Total Square Footage: 22,579

Contact: John V. E. Hardy, Owner Representative
"The Richard K. Davis organization consists of experienced and highly trained staff with whom it was a pleasure to work. Not a single inspection uncovered any omission, error or shoddy workmanship; accounting and billing practices were accurate and detailed; and their emphasis on safety during construction was a further indication of organizational competence."

SCOPE AND RESPONSIBILITIES:

Trinity Episcopal Church chose Richard K. Davis Construction Corporation **Design/Build Service** to assist in the redesign and construction of a \$6 million complex of buildings that had previously been proposed at more than twice the client's budget. We successfully constructed a new Sanctuary, Music and Youth Buildings; all meeting the owners' original goals and staying within their budget. The required aesthetics were maintained by incorporating 49 gothic arch-topped stained glass windows and a large pipe organ filling one of four 48 foot transepts, each vaulted with exposed heavy timber construction. As a final touch, a carillon bell tower (one of only three in Florida) graces the sanctuary's main entry.

DESIGN PARTNERS:

Edlund, Drietenbas, Binkley
Architect & Associates, Inc.
Architect

Mosby And Associates, Inc.
Civil Engineer

Brad Smith Associates, Inc.
Landscape Architect
