WE'RE BUILDING SOLUTIONSSM

PROFESSIONAL OFFICE - MEDICAL

DR. RUSSELL M. DAVIS, D.M.D.

FORT PIERCE

Date Of Completion: November 2000

Total Square Footage: 2,385

Contact: Dr. Russell M. Davis, D.M.D., Owner
"They did an outstanding professional job of overseeing and directing both construction of the building and incorporating all necessary equipment for a dental facility. I would recommend Richard K. Davis Construction to anyone considering commercial construction with a well-deserved five-star rating."

SCOPE AND RESPONSIBILITIES:

When Dr. Russell Davis set out to build his own dental office in Fort Pierce, he chose the **Design/Build Service** of Richard K. Davis Construction Corporation. Continuing to run his dental practice in a leased building, Dr. Davis was looking for a single-source entity to take care of his entire project. Richard K. Davis worked closely with the doctor, architect and the dental equipment supplier to "extract" the information necessary to design the 2,385 SF dental facility including water, vacuum and air for each state-of-the-art procedure room. As an added benefit, each room was designed with large, angled windows positioned to allow patients to enjoy relaxing views of the landscaping and gardens outside.

DESIGN PARTNERS:

Terry Kellagher, C.S.I.
Architect

Joseph T. Friscia, P.E., Inc.
Civil Engineer

William A. Flint
Landscape Architect
